

Esercizi su DFA, NFA

1) $\{w \in \{0,1\}^+ \mid w = 01x = x01 = 01x01, x \in \{0,1\}^*\}$

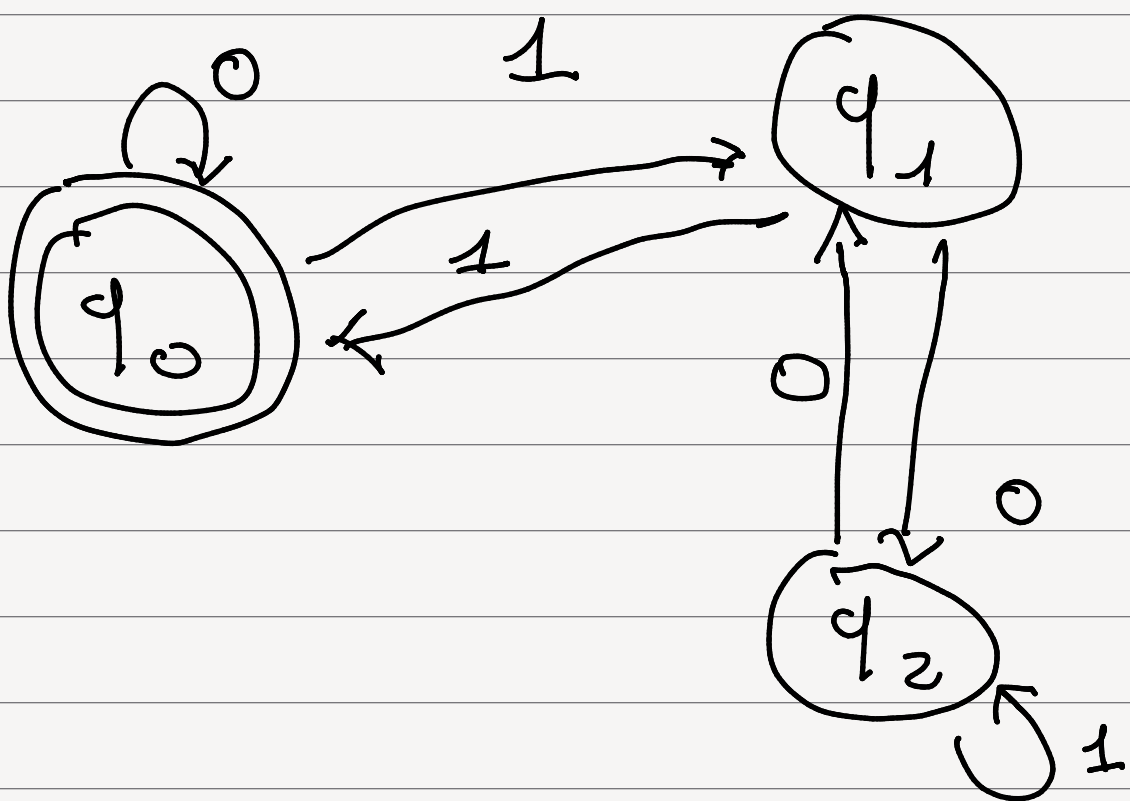

Scriviamo NFA:

~ ~ ~

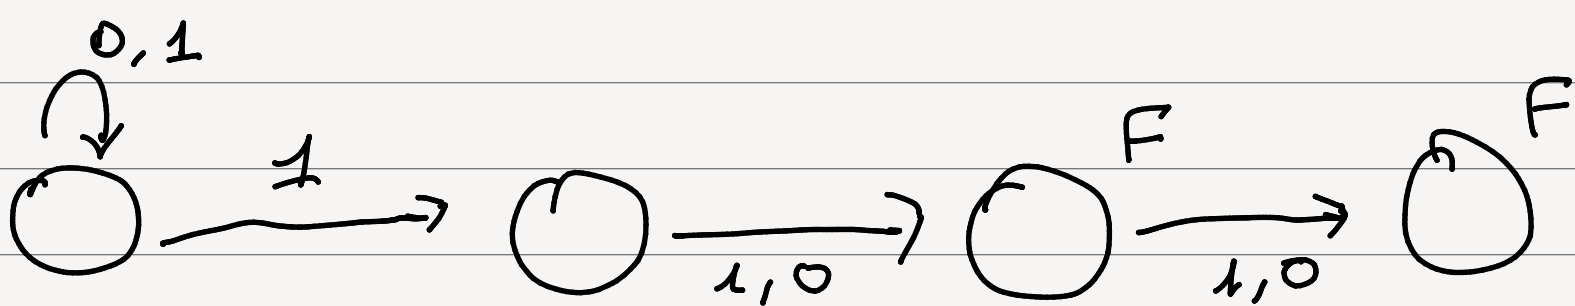

$$\{w \in \{0,1\}^* \mid w \text{ multiplo di } 3\}$$

$$\{w \in \{0, \dots, 9\}^+ \mid \text{le cifre finali } \bar{x} \text{ gi\`e apparse}\}$$

Scrivere e.r. con $\Sigma = \{a, b\}$ con 2 o 3 "b".
 $a^* b a^* b \cup a^* b a^* b a^* = a^* b a^* b (\epsilon \mid b a^*)$

$$L' \text{ e.r. } \bar{x}: (011)^* 1 (110)(\epsilon \mid (110))$$
